Dear Gingerbread House Committee:

In participation of the 2020 Gingerbread House building Competition, we built a structurally sound gingerbread house.

The report that follows has been prepared by the builders (Jeanne Wingate, Administrative Employee, and her daughter). The following summary highlights the major features of this property.

### **Summary**

We created a restored 2 story barn utilized as a modern farmhouse, to practice sustainable building.

This gingerbread beauty is cradle to cradle, created with the intention to enjoy, ingest, and then digest.

The structural system of the homemade Gingerbread is good to delicious, and additionally supported with Little Debbie Nutty Buddy posts.

The exterior barnboards of Royal Icing are sweet!

The metal style roof of Vanilla Wafers is in need of tasting.

The north wall of the building highlights the American Flag. God Bless America.

In summary, we consider this home to be in mouthwatering condition and deliciously sweeter than others of similar construction type.

Thank you,

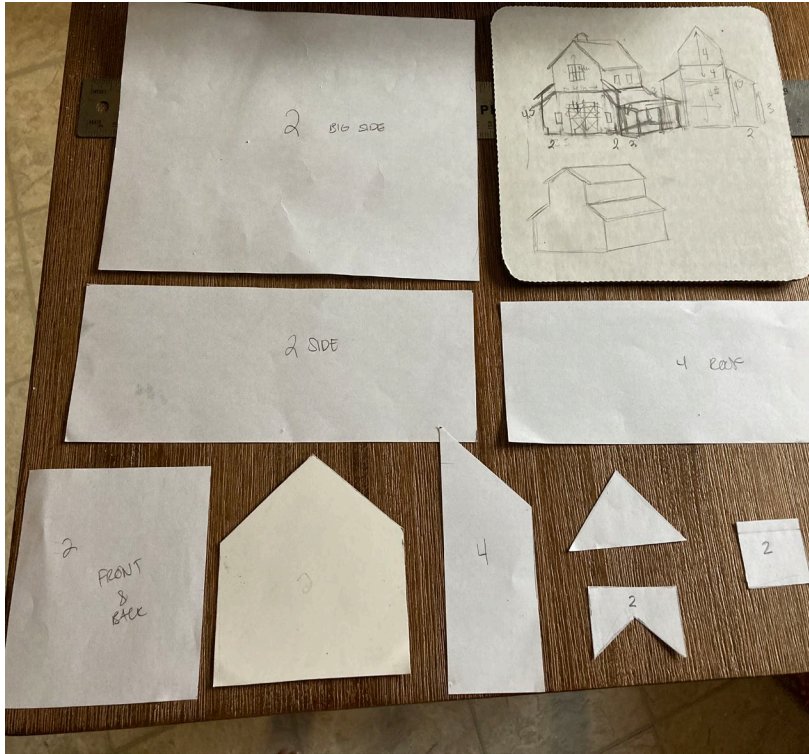

***Criterium-Lalancette & Dudka Engineers***
